Come Hack Workshop

Breaking News!

This will be the last session of the semester.

We'll be back next semester with more juicy stuff.

Plans for today

- Practice on CyLabs
- Use DevTools, CURL, or BurpSuite for WebApp Exploitation
- We'll look for flags in these challenges
- Explore HTTP (hypertext transport protocol)

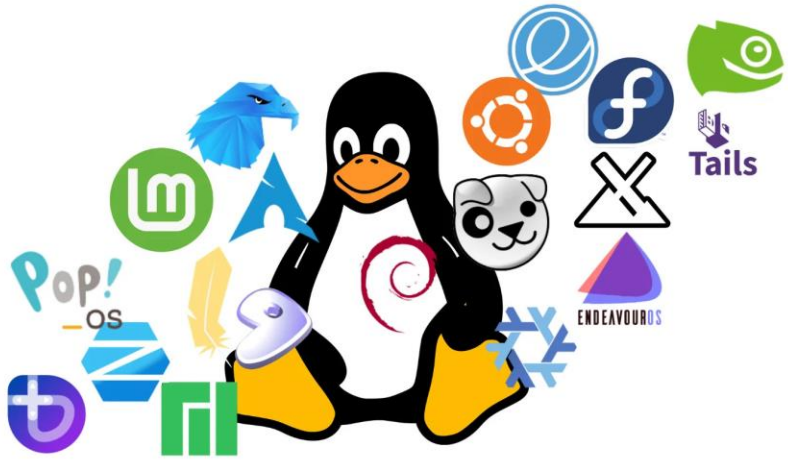

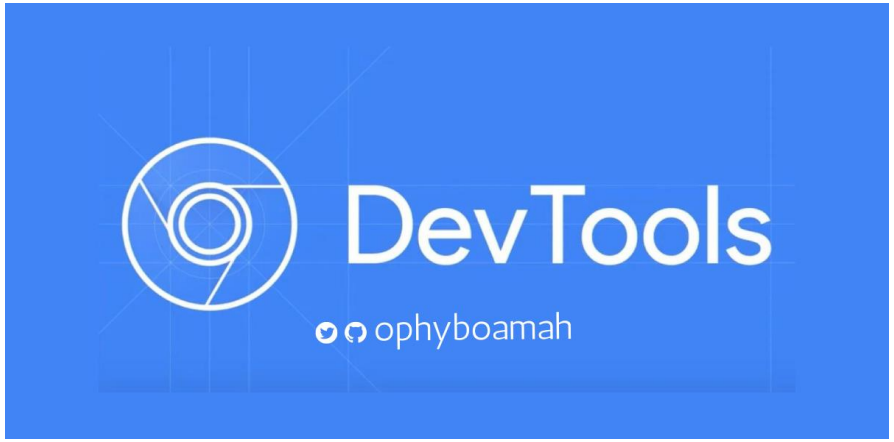

What will we be using?

- A bunch of different tools

  - Mainly native dev tools & curl for webapps
  - For forensics we'll figure it out (use google)
  - Command Line Interface

30 years

Trace the Hacker

12:00 – 2:00 PM

Lubert Commons

+ Calendar

What are we doing today?

- Today: we work through a bunch of CyLab labs together
- https://cisa.cybernet.rocks/writing/

OCTOBER 15, 2026 · MOUSSA TOURE · 2 MIN READ ›

CyLabs Workshop

Hands on practice on a free cybersecurity education program created by security experts at Carnegie Mellon University built around hands-on Capture the Flag challenges.

ctf linux privesc

Resources

- TCM Security try this first lots of free high qual content
- HackTheBox Academy most valuable IMO
- pwn college Great resource
- hackersploit more advanced but still good to read and watch
- PortSwigger Academy great for web app vulnerabilities
- TryHackMe Very beginner friendly
- OpenClassroom a lot of free courses well structured
- 101 Labs.net Great to learn hands-on platform for practice in vm
